PRODUCT INFORMATION SUMMARY

RAT IFN Gamma ELISA KIT

Pre-Coated Microplate 96 Tests

CAT. NO. CK200355

ASSAY RANGE 0 - 2000 pg/mL

SENSITIVITY < 25 pg/mL

TOTAL INCUBATION TIME 3.25 hrs.

This kit is based upon sandwich immunoassay technique, using a streptavidin-HRP and TMB (Tetra Methyl Benzidine) substrate. All reagents are supplied. A typical standard curve is included for each lot. There is no International Standard for RAT IFN gamma, therefore pg/unit values can only be approximated.

Stability up to six months from date of shipping.

FOR RESEARCH USE ONLY
