

ANTIGENIX America Inc.

Human CAR-T Cell
MULTI-PLEX ELISA Kit
8-Plex ELISA kit

CAT NO. CK500960

96 tests

Features / Description:

Monoclonal Antibody-based , single plate ELISA kit for Simultaneous Detection and Quantitation of Human CAR-T Cell cytokine panel:

IL-1 Beta
IL-6
IL-8
IL-10
IL-15
GM-CSF
IFN Gamma
MCP-1

Multi-Plex ELISA designed to measure cytokine levels relevant to CAR-T-Cell Therapy.

ELISA kit contains:

- Pre-Coated 96 well ELISA plate- each of 12 strips coated with the 8 cytokine detection monoclonal antibodies.
- Suitable for high and low standard curves with 10 samples per plate.
- Semi-Quantitative assay. Higher accuracy can be achieved by using more data points (in standard curves).
- Assay Time: 3.5 hours, Samples: Cell Culture Supernatants, or other biological fluids. Sample size: 100 uL.
- HRP detection with lyophilized standard mix (8 cytokines) for easy plate prep, includes all developing reagents needed.
