Range of biologic activity: 0.05 - 20 ng/mL

HANDLING AND STORAGE:

Purified Human TNF Alpha factor is provided lyophilized. Store lyophilized, at -20° C. Can be reconstituted with **sterile water** to a concentration of 100 ug/mL, then dilute in PBS or other buffered solutions. Store small aliquots at -20° C for long-term storage, at high concentration.

Microcentrifuge before reconstitution. Because ANTIGENIX factors are provided without carrier proteins like sucrose or BSA, the small quantities of lyophilized protein can adhere to the sides and cap of the vial during manufacture. **Before opening the vial**, we recommend microcentrifuging for 30 seconds to spin-down all material.
