# PRODUCT INFORMATION SUMMARY

# Human GDF-15

(Growth Differentiating Factor -15)

Purified Factor Product Number HC67740B 20.0 ug Product Number HC67740A 5.0 ug

## DESCRIPTION:

Human GDF-15 (Growth Differentiating Factor -15,) is a TGF Beta family protein, expressed in predominately in placenta tissue. GDF-15 can be found in amniotic fluid and in serum of pregnant women, and thus may play role in embryonic development. GDF-15 exerts a tumor supressive activity, yet is correlated with progression of some tumors- including colorectal, prostate, and pancreatic.

This recombinant cell-derived Human GDF-15 is a homodimeric protein with two 112 aa chains with MW of approx. 24.6 kDa.

**SOURCE:** CHO cells

Purity > 96% by HPLC analysis
Endotoxin < 0.1 ng per ug GDF-15</pre>

BIOLOGICAL ACTIVITY: Inhibits alkaline phosphatase activity in osteoblasts (MC3T3) with half-maximal effect @ 100-200 ng/mL.

#### HANDLING AND STORAGE:

Purified GDF-15 is provided lyophilized. Store lyophilized, at  $-20^{\circ}$  C. Can be reconstituted with **sterile or distilled water** to a concentration of approx. 100 ug/mL, then dilute in PBS or other buffered solutions. Store small aliquots, **with addition of 0.1% BSA**, at  $-20^{\circ}$  C, for up to 3 months, at high concentration.

Microcentrifuge before reconstitution. Because ANTIGENIX factors are provided without carrier proteins like sucrose or BSA, the small quantities of lyophilized protein can adhere to the sides and cap of the vial during manufacture. Before opening the vial, we recommend microcentrifuging for 30 seconds to spin-down all material.

### RESEARCH USE ONLY -NOT for DRUG USE
