ANTIGENIX AMERICA Inc. 1-800-558-1008 PRODUCT INFORMATION SUMMARY

Human IGF-II (Insulin-Like Growth Factor)

Purified Factor

Product Number

HC88827B 50 ug HC88827A 10 ug

DESCRIPTION:

Human Insulin-Like growth Factor II (IGF) is a protein that induces proliferation in a wide range of cell types and is a 7.5 kDa protein with 67 aa. residues.

SOURCE: E. Coli

Purity > 97% by HPLC analysis Endotoxin < 0.1 ng per ug IGF-II

BIOLOGICAL ACTIVITY:

Fully biologically active when compared to standards. Specific activity as measured by competitive binding against plasma derived IGF-II to human placvental membranes is 1×10^6 units/mg corresponding to 1.0 mg/mL. For most applications, IGF-II exerts biological activity in range 0.5 - 25 ng/mL.

HANDLING AND STORAGE:

Purified Human IGF-II factor is provided lyophilized with no additives. Store lyophilized, at -20° C. Upon reconstitution with 10 mM acetic acid to a concentration of 100 ug/mL, further dilute in PBS or other buffered solutions. Store small aliquots at -20° C for long-term storage, at high concentration. **Before opening vial**, it is recommended to microcentrifuge vial for 30 seconds to spin-down any lyophilized

Before opening vial, it is recommended to microcentrifuge vial for 30 seconds to spin-down any lyophilized material that may adhere to top of vial. The small amounts of protein may adhere to the vial as a very thin coat of lyophilized material, and may be difficult to see as a pellet.

WARRANTY:

Products sold hereunder are warranted only to conform to the quantity and contents stated on the label at the time of delivery to the customer. There are no warranties, expressed or implied, which extend beyond the description on the label of the product.
