

PRODUCT INFORMATION SUMMARY

ANTI-Human IFN Gamma

(Polyclonal Rabbit)

Rabbit Antibody	Product Number RHF840	0.1 mg
	Product Number RHF840B	Biotin 50 ug

* Antigen-Affinity Purified

SPECIFICITY:

Rabbit polyclonal antibody specific for Human Interferon Gamma. This antibody will Neutralize bioactivity of human IFN Gamma. Antibody fraction further purified by antigen-affinity purification to yield high specificity in applications.

SOURCE: Rabbit serum, Antigen-Affinity Purified, Sterile-filtered, lyophilized, additive-free

RESEARCH APPLICATIONS:

Neutralization: Half-maximal inhibition of 50 pg/mL human Interferon Gamma, antibody concentration of 0.06 ug/mL is required.

Western Blot: Antibody concentration of 0.2 ug/mL was used to detect 1.5 ng/lane of recombinant human IFN Gamma under both reducing or non-reducing conditions.

ELISA: Antibody concentration of 0.5 ug/mL (100 ul/well) was used to detect 0.4 ng/well of recombinant IFN Gamma.

HANDLING AND STORAGE:

Provided lyophilized. Reconstitute in 100 uL sterile water. This may be stored for approximately one month at 4°C. For long-term storage, store small aliquots frozen, at high concentration. Avoid more than one freeze - thaw cycle. Dilutions should be made in PBS or other stabilizing buffer containing BSA or gelatin (0.2%) as suitable for particular application.

WARRANTY:

Products sold hereunder are warranted only to conform to the quantity and contents stated on the label at the time of delivery to the customer. There are no warranties, expressed or implied, which extend beyond the description on the label of the product.
