

PRODUCT INFORMATION SUMMARY

Anti-EMAPP-II (Goat Polyclonal)

Purified Goat Polyclonal Antibody Product No. RHF902 0.1 mg
* ANTIGEN-AFFINITY Purified

SPECIFICITY:

Goat polyclonal antibodies to human EMAPP-II, produced from highly purified recombinant human EMAPP-II immunogen. Antiserum fraction purified by **Antigen-Affinity** chromatography to produce highly specific, high titre preparation.

SOURCE: Goat antiserum.

RESEARCH APPLICATIONS:

Identification of human EMAPP-II in body fluids and tissue sections.

ELISA: Antibody concentration of 0.5 ug/mL (100 uL/well) was used in ELISA to detect 0.4 ng/well recombinant human EMAPP-II.

NEUTRALIZING ACTIVITY: not currently tested.

WESTERN BLOT: Antibody concentration of 0.2 ug/mL was used to detect 1.5 ng/lane of recombinant human EMAPP-II under both reducing and non-reducing conditions.

HANDLING AND STORAGE:

Purified polyclonal antibody provided lyophilized from PBS. Reconstitute in 100 uL **sterile** water. This is stable for one month at 4 degrees C. These preparations should be diluted in a protein-containing or other stabilizing medium to a concentration suitable for use in specific protocols. Small aliquots may be frozen at -20° C for long-term storage. All reagents in a liquid state should be stored at 2-8° C when not in use. Avoid repeat freeze-thaw cycles.

WARRANTY:

Products sold hereunder are warranted only to conform to the quantity and contents stated on the label at the time of delivery to the customer. There are no warranties, expressed or implied, which extend beyond the product label description.

**RESEARCH USE ONLY
NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE.**
