PRODUCT INFORMATION SUMMARY

ANTI-Mouse MIP-1 Gamma (Polyclonal Rabbit)

PRODUCT NUMBER RMF430 Purified 0.1 mg

ANTIGEN DISTRIBUTION AND SPECIFICITY:

Rabbit polyclonal antibodies specific for Mouse MIP-1 Gamma.

Developed using highly purified recombinant Mouse MIP-1 Gamma as immunogen. Further purified using **antigen-affinity chromatography** to produce superior specificity and titre.

Source: Rabbit serum, Purified by Antigen-Affinity chromatography. Lyophilized, no additives.

Characterization:

ELISA: Antibody concentration of 0.5 ug/mL (100 uL/well) to detect 0.4 ng/well Mouse MIP-1 Gamma.

WESTERN BLOT:Antibody concentration of 0.2 ug/mL used to detect 3.0 ng/lane mouse MIP-1 Gamma under both reducing and non-reducing conditions.

Neutralization: not tested.

HANDLING AND STORAGE:

Reagent supplied as lyophilized, 0.5X PBS, pH 7.4., additive-free. **Store frozen at -20 deg. C.** Purified antibody should be reconstituted with 100 uL sterile water. Further dilutions should be made in a protein-containing buffer or other stabilizing medium (BSA or gelatin/PBS) to a concentration suitable for use in specific protocols. Stable for 4 - 6 weeks after reconstitution and stored at 4 degrees C. For long-term storage should be frozen in small aliquots, or add preservative (ie. 0.1 % sodium azide or similar) to store liquid.

Reagent is provided preservative-free.

FOR RESEARCH USE ONLY. NOT INTENDED FOR THERAPEUTIC OR DIAGNOSTIC USE.
